Vision

To be the steel company that pioneers a new standard in NAFTA for providing customers with the right products, at the right time and at the right quality.

Create new possibilities for innovative and sustainable steel use to develop a better future.

Inspire our Team Members to release their true potential to attain the highest levels of achievement.

Overview

ThyssenKrupp Steel USA is located in Calvert, Alabama. It is a member of the global technology group ThyssenKrupp headquartered in Essen, Germany. The company was created in 2007 to construct and operate a carbon steel processing facility to serve customers in the NAFTA market. The company began the first of its operations in July of 2010, with the capacity to process 4.3 million metric tons of flat rolled carbon steel products annually.

- The facility includes a river terminal, hot strip mill, cold rolling mill, four hot dip galvanizing lines, rail yard and supporting infrastructure.
- The facility receives its raw material carbon steel slabs used in processing from ThyssenKrupp CSA, a newly constructed steel making facility located in the state of Rio de Janeiro, Brazil which began operations in 2010.
- The company employs approximately 1,800 Team Members.

Customers & Products

The company serves the automotive, construction, pipe and tube, service center, and appliance/HVAC industries in the NAFTA region with a comprehensive list of coiled products in a full range of steel grades for high-value applications including hot rolled bands, hot rolled pickled and oiled, cold rolled, and coated (galvanized, galvanized, aluminized and Galvalume®)
